

P.U.R.T.TM PET URINE REMOVAL TREATMENT

HERE'S HOW IT WORKS

Following 10 years of research and testing by a team of Ph.D. chemists and botanists, Harris Research Inc. has applied for U.S. and international patents on the most significant discovery in odour removal history P.U.R.T. (Pet Urine Removal Treatment).

P.U.R.T. is a natural extract from plants, spices, herbs and citrus coupled with fibre protecting polymer.

You no longer need to use ineffective chemical products containing strong perfumes, deodorants, and disinfectants which only cover up the problem for a short period of time.

Using sensitive electronic equipment, your Chem-Dry specialist can quickly locate the exact source of odour in your carpet. The damaged area will be rinsed, using powerful sub-surface extraction equipment. In many cases you will be able to see the urine leave the carpet. P.U.R.T. is then applied to the fibres and the backing of your carpet. It instantly reacts with urine molecules, breaking them down and allowing them to be permanently removed.

This revolutionary system works on all types of urine and permanently removes odour, regardless of how severe it is. Don't settle for a cover-up when you can have a total cure.

Following the removal process, a Metro Chem-Dry technician will return within 48 hours and check, inspect and clean the treated area leaving you with a fresh smelling, Cleaner, Drier, HealthierTM home.

Present this brochure and receive a FREE Chem-Dry "Power Spotter Bottle"! (for future mishaps)

The guilty party is featured to the right when questioned about this incident he claimed he was innocent and that it must have been someone else. When presented with the evidence he said "OK, you got me! A dog's got to do what a dog's got to do if I'm locked-up all day!"
